

CREATING A WEBSITE USING WORDPRESS PART 1

By Amellia Rasida Binti Muhamad Afandi

Workshop goal

- 1) Overview of WordPress.
- 2) How to install.
- 3) How to develop site in WordPress.
- 4) Theme.
- 5) Plugin.

What you need

- 1) Laptop (computer) and Internet connection.
- 2) Wamp or xampp server (local server).
- 3) Wordpress package.
- 4) [PHP](#) version & [My SQL](#) version

WORDPRESS OVERVIEW

WordPress is an open-source and free Web publishing application, content management system (CMS) and blogging tool built by a community of developers and contributors. WordPress allows users to build dynamic websites and blogs that may be updated, customized and managed from its back-end CMS and integrated application and components.

WORDPRESS –SETUP(CONFIGURATION) STEPS

BASIC STEPS :

Step 1: Install local server(WAMP or XAMPP).

Step 2: Start server.

Step 3: Download WordPress package from <https://wordpress.org/>

The screenshot shows the WordPress.org homepage. At the top, there is a navigation bar with the WordPress logo and the text "WORDPRESS.ORG". Below the logo, there are links for "Showcase", "Themes", "Plugins", "Mobile", "Support", "Get Involved", "About", "Blog", and "Hosting". A prominent "download here" link is visible, with a red box highlighting the "Download WordPress" button next to it. Below the navigation bar, there is a section titled "WordPress is web software you can use to create a beautiful website or blog. We like to say that WordPress is both free and priceless at the same time." This section includes a description of the software and a "Download WordPress 4.2.2" button. At the bottom of the page, there are several sections: "WordPress Swag", "News From Our Blog" (with a link to "WordPress 4.2.2 Security and Maintenance Release"), "It's Easy As..." (with a list of steps), and "WordPress Users" (with logos for "MOTLEY CRUE" and "The New York Times").

WORDPRESS –SETUP(CONFIGURATION) STEPS

BASIC STEPS :

Step 4: Paste WordPress package and past in www (wamp server) htdoc for xampp server directory.

Step 5: Open PHP my admin and create database

The screenshot displays the phpMyAdmin interface for a localhost environment. The top navigation bar includes options for Databases, SQL, Status, Users, Export, Import, Settings, Binary log, and More. The main content area is titled 'Databases' and features a 'Create database' form with a text input field, a 'Collation' dropdown menu, and a 'Create' button. Below the form is a table listing existing databases and their replication status.

Database	Master replication	
<input type="checkbox"/> information_schema	✓ Replicated	Check Privileges
<input checked="" type="checkbox"/> khanjanbrass	✓ Replicated	Check Privileges
<input checked="" type="checkbox"/> magento1	✓ Replicated	Check Privileges
<input type="checkbox"/> mysql	✓ Replicated	Check Privileges
<input type="checkbox"/> performance_schema	✓ Replicated	Check Privileges
<input checked="" type="checkbox"/> test	✓ Replicated	Check Privileges
<input checked="" type="checkbox"/> wordpress	✓ Replicated	Check Privileges
<input checked="" type="checkbox"/> ysoft	✓ Replicated	Check Privileges
Total: 8		

At the bottom of the interface, there are controls for 'Check All' (with a checkbox), 'With selected:' (with a dropdown menu), and 'Drop' (with a trash icon). A link to 'Enable Statistics' is also visible.

WORDPRESS –SETUP(CONFIGURATION) STEPS

BASIC STEPS :

Step 5: Open WordPress package in browser(localhost/your folder name) (configure according to your database name and password)

Example :

`http://localhost/wordpress/`

name of folder that
you put wordpress
package at www
directory

FOR YOUR CASE, WE ALREADY PUT WORDPRESS PACKAGE TO YOUR WWW DIRECTORY AND UTM SERVER, THUS YOU JUST OPEN THE LINK THAT WE WILL GIVEN TO YOU AND START YOUR INSTALLATION

WORDPRESS –SETUP(CONFIGURATION) STEPS

BASIC STEPS :

Step 5: Open WordPress package in browser(localhost/your folder name) (configure according to your database name and password)

OPEN URL icm.fskm.utm.my/scsd/your name

On this page you will see a message, asking you to prepare the necessary information for the installation. Since we already have this information, simply press the **Go!** button.

Step 6: Run and install

On this page you will see a message, asking you to prepare the necessary information for the installation. Since we already have this information, simply press the **Go!** button.

Step 6: Run and install

Enter the details for your newly created MySQL database and press the **Submit** button

The image shows the WordPress installation database configuration screen. At the top is the WordPress logo. Below it is a paragraph of instructions. The form consists of five rows, each with a label, a text input field, and a description. The input fields contain the following values: 'user_dbname', 'user_username', 'yourpassword', 'localhost', and 'wp_'. A large circular 'Submit' button is located at the bottom left of the form area.

 **WORDPRESS**

Below you should enter your database connection details. If you're not sure about these, contact your host.

Database Name	<input type="text" value="user_dbname"/>	The name of the database you want to run WP in.
User Name	<input type="text" value="user_username"/>	Your MySQL username
Password	<input type="text" value="yourpassword"/>	...and your MySQL password.
Database Host	<input type="text" value="localhost"/>	You should be able to get this info from your web host, if localhost does not work.
Table Prefix	<input type="text" value="wp_"/>	If you want to run multiple WordPress installations in a single database, change this.

Step 6: Run and install

WordPress will now check if your settings are correct. If you have entered all the necessary information, you will see a confirmation screen. Press the **Run the Install** button to proceed.

Step 6: Run and install

On the next screen you will have to enter the information about your administrative username and the title of your new site. In addition, you can specify whether you'd want search engines to index your site or not. Once you fill in that information, press the Install WordPress button. Bear in mind, however, that you should specify a real email address. It can be later used in case you forget your password.

Step 6: Run and install

Welcome

Welcome to the famous five minute WordPress installation process! You may want to browse the [ReadMe documentation](#) at your leisure. Otherwise, just fill in the information below and you'll be on your way to using the most extendable and powerful personal publishing platform in the world.

Information needed

Please provide the following information. Don't worry, you can always change these settings later.

Site Title

Username

Usernames can have only alphanumeric characters, spaces, underscores, hyphens, periods and the @ symbol.

Password, twice

A password will be automatically generated for you if you leave this blank.

Strong

Hint: The password should be at least seven characters long. To make it stronger, use upper and lower case letters, numbers and symbols like ! " ? \$ % ^ &).

Your E-mail

Double-check your email address before continuing.

Privacy

Allow search engines to index this site.

WORDPRESS –SETUP(CONFIGURATION) STEPS

Step 7: STEP 7: Login in admin panel with user name and password

WORDPRESS –SETUP(CONFIGURATION) STEPS

Step 8: Visit your site

The screenshot displays the WordPress Dashboard interface. At the top, the browser address bar shows 'My Blog' and the user is logged in as 'Howdy, admin'. The dashboard title is 'Dashboard'. On the left, a sidebar menu lists various management options: Home, Updates, Posts, Media, Links, Pages, Comments, Appearance, Plugins, Users, Tools, and Settings. The main content area features a large blue box with the WordPress logo and 'Version 2.4.2'. Below this, a welcome message reads: 'Welcome to your new WordPress site! If you need help getting started, check out our documentation on [First Steps with WordPress](#). If you'd rather dive right in, here are a few things most people do first when they set up a new WordPress site. If you need help, use the Help tabs in the upper right corner to get information on how to use your current screen and where to go for more assistance.'

Below the welcome message are three columns of instructions:

- Basic Settings**: Here are a few easy things you can do to get your feet wet. Make sure to click Save on each Settings screen.
 - [Change your privacy settings](#)
 - [Select your timezone and time zone](#)
 - [Turn comments on or off](#)
 - [Fix or your profile](#)
- Add Real Content**: Check out the sample page & post editors to see how it all works, then delete the default content and write your own!
 - [View the sample page and post](#)
 - [Delete the sample page and post](#)
 - [Create an About Me page](#)
 - [Write your first post!](#)
- Customize Your Site**: Use the current theme — Twenty Eleven — or [choose a new one](#). If you stick with Twenty Eleven, here are a few ways to make your site look unique.
 - [Change the color scheme](#)
 - [Set a background color](#)
 - [Select a new header image](#)
 - [Add some widgets](#)

At the bottom, there are sections for 'Right Now' and 'QuickPress'.

Choose a theme for your site

Then you can see the chosen theme by go to visit site

The image shows a screenshot of a WordPress website. The page has a light blue header with the text 'Choose a theme for your site'. Below the header, there is a white box containing the text 'Then you can see the chosen theme by go to visit site'. The main content area is a white box with a light blue border. It features a search bar with the text 'Search ...'. Below the search bar, there is a section titled 'RECENT POSTS' with a single post titled 'Hello world!'. Below this, there is a section titled 'RECENT COMMENTS' with two comments: 'amellia90 on Sample Page' and 'Mr WordPress on Hello world!'. The main content area also features a large 'Hello world!' heading, followed by the text 'Welcome to WordPress. This is your first post. Edit or delete this post to start blogging!'. Below this text, there is a light blue bar with the date 'May 26, 2015', '1 Comment', and an 'Edit' link. At the bottom of the page, there is a white box with the text 'Proudly powered by WordPress'.

Choose a header

Apply a custom header to your site by clicking the header link under Appearance Menu:

The image shows a screenshot of the WordPress dashboard. On the left side, there is a dark sidebar menu with various options. The 'Appearance' option is highlighted with a red box. A sub-menu is open from 'Appearance', and the 'Header' option is also highlighted with a red box. The main content area of the dashboard is visible in the background, showing a 'Welcome to WordPress!' message and several action buttons like 'Customize Your Site'.

Choose a header

Upload image to be your header

The image shows a screenshot of the WordPress dashboard's appearance settings. On the left, the 'Header Image' section is expanded, showing instructions and a 'Current header' area with a 'No image set' placeholder. A red box highlights the 'Add new image' button, with a red arrow pointing to the text 'click here to upload image'. The main content area shows a live preview of the site header with the text 'Hello world!' and a search bar. Below the preview, there are sections for 'RECENT POSTS', 'RECENT COMMENTS', 'ARCHIVES', and 'CATEGORIES'. The right sidebar shows the 'Hello world!' post title, a welcome message, and a 'Proudly powered by WordPress' footer.
