INTRODUCTION

OBJECTIVE

The teaching module for Data Structures and Algorithms is intended to be used as teaching and learning reference as a practical problem-solving class activity.

CONTENT OF THE MODULE

The module consists of three parts: Key concepts, Programming Exercise and Exercise. The objective of Key Concepts material is to be used for class lecture session. The content of the material is in the form of short notes that explain the main concepts of data structure. Programming exercises provide problem solving activities whereby the students apply the data structure concepts effectively in solving problem in C++. Exercises contains various type of questions in order to asses the students knowledge on data structure concepts theoretically and practically. The learning outcomes or objectives for each module are stated at the beginning of every module. Mini project and assignments in this course are to expand and evaluate problem solving skills of the students. The specification of the mini project is included in the Appendix of this module.

The data structure concepts included in this module are: Introduction To Data Structure, Abstract Data Type and Class, Recursive, Algorithm Efficiency, Sorting Techniques, Searching, Link List, Stack, Queue, and Tree.

ACKNOWLEDGEMENT

The authors gratefully acknowledge all contributors to this workbook in term of ideas, selected questions and comments. Thanks to the Software Engineering Department and Faculty of Computer Science and Information Systems for their support in preparing this material.

CONTENTS

MODULE	TOPIC	PAGE
1	INTRODUCTION TO DATA STRUCTURE	1
	Objectives For Students	1
	1.0 Software Engineering And Problem Solving	1
	2.0 Algorithm	2
	3.0 Data Structure	3
	4.0 Programming Paradigm	8
	5.0 Programming Principle	9
	Exercises	11
2	ABSTRACT DATA TYPE AND CLASS	17
	Objectives For Students	17
	1.0 Abstract Data Type	17
	2.0 C++ Class	19
	3.0 Class As Function Parameter	24
	4.0 Class As Return Value From Function	27
	5.0 Array Of Class	28
	6.0 Pointer To Object	30
	7.0 Basic C++ File Opertions	32
	8.0 Header File And Implementation File	34
	Programming Exercises	37
	Exercises	51
	RECURSIVE	59
	Objectives For Students	59
	1.0 Introduction To Recursion	59
	2.0 Designing Recursive Algorithm	60
	3.0 Implementation Of The Recursive Algorithms	60
	Programming Exercises	67
	Exercises	71

4	ALGORITHM EFFICIENCY	75
	Objectives For Students	75
	1.0 Introduction To Algorithms	75
	2.0 Complexity Of Algorithm	76
	Programming Exercises	83
	Exercises	87
5	SORTING	91
	Objectives For Students	91
	1.0 Introduction To Sorting	91
	2.0 Sorting Process	93
	3.0 Sorting Algorithms	93
	4.0 Bubble Sort	94
	5.0 Selection Sort	101
	6.0 Insertion Sort	105
	7.0 Summary Of Quadratic Sorting Algorithms Complexity	109
	8.0 Merge Sort	109
	9.0 Quick Sort	115
	10.0 Summary	121
	Programming Exercises	122
	Exercises	125
6	SEARCHING	135
	Objectives For Students	135
	1.0 Introduction To Searching	135
	2.0 Basic Sequential Search	136
	3.0 Binary Search	140
	Programming Exercises	145
	Exercises	152
7	LINKED LIST	161
	Objectives For Students	161
	1.0 Introduction To Linear List	161
	2.0 Array As A Linear List	162
	3.0 Linked List	165
	4.0 Implementation Of Linked List	167

	Programming Exercises	173
	Exercises	179
8	STACK	183
	Objectives For Students	183
	1.0 Introduction To Stack	183
	2.0 Stack Implementation	185
	3.0 Array Implementation Of Stack	185
	4.0 Linked List Implementation Of Stack	190
	5.0 Stack Application	195
	Programming Exercises	204
	Exercises	210
9	QUEUE	219
	Objectives For Students	219
	1.0 Introduction To Queue	219
	2.0 Queue: Linear Array Implementation	221
	3.0 Queue: Circular Array Implementation	225
	4.0 Queue Implementation Linked List	227
	5.0 Queue Implementation: Linear Linked List And Circular Linked List	229
	Programming Exercises	232
	Exercises	240
10	TREE	249
	Objectives For Students	249
	1.0 Introduction To Tree	249
	2.0 Tree Terminology	251
	3.0 Binary Tree	253
	4.0 Binary Search Tree	258
	5.0 Binary Search Tree Implementation	259
	Programming Exercises	274
	Exercises	277
APPENDIX 1	SAMPLE PROJECT DOCUMENTATION	287
