

Figure 7.9 Axonometric by Francis Tibbalds.

contain little written information. Before deciding on the techniques to be used in the preparation of the final design drawings, the method of presentation should be determined. If the presentation is to include a public exhibition, an illustrated report and a talk accompanied by slides, ideally, three sets of drawings would be required.

A set of design drawings normally includes a location map showing the site in relation to the city or its region; a layout of the site showing access points, internal vehicular and pedestrian circulation, the main building blocks and the landscaping; sections through the site and its buildings showing the relationship of the floors and the positions of
