

"Some of the basic principles widely used by many researchers are Lagrange-Euler (LE) equations (Vicker, 1965; Bejczy and Paul,1981), Newton-Euler (NE) equations (Luh *et al.*, 1980a) and d'Alcmbert (G-D) equations (Lee *et al.*, 1983)."

"Luh *et al.* (1980b) presented an example of an acceleration control of robot arm/manipulator."

- (f) Cross referencing in not allowed in a thesis. Only primary sources should be used.

3.2.2 List of References

All references cited should be listed in the List of References at the end of the last chapter. List the references alphabetically. If more than one published materials by the same author are cited, these materials should be listed chronologically. For example, an article by Scholfield published in 1964 should be listed before the one published in 1967.

3.2.3 Writing Style for Authors' Names in the List of References

Generally authors' names are listed using surname followed by their initials. The followings are examples of writing style according to the name of the author:

- (i) Single and multiple authors

Example (single author) :

Veres, S. M. (1990). *Structure Selection of Stochastic Dynamic Systems*.

New York: Gordon and Breach Science Publishers.

Example (two or more authors):

Soderstrom, T., and Stoica, P. (1989). *System Identification*. United Kingdom: Prentice Hall International Ltd.
