VEG VEGETABLE GARDENS
TABLE GARDENS
GARDENS GARDENS
VEGETABLE D GARDENS

Vegetable gardens are popping up in public places all over—not just in backyards anymore. Gardeners are using land that sits empty or squeezing plants into small, leftover open spaces. Landscape architects often help **design community food gardens**, especially in cities. A lot of schools and churches have started vegetable gardens. This one is at **Miller Creek Middle School in San Rafael, California.**
