

# 1.14 A REMARKABLE INCREASE IN PUBLIC LIFE

**1993-2004**  
**Bourke Street Mall, Melbourne**  
 From 43,000 to 81,000 pedestrians per day. Evening traffic has trebled and is now almost 20% of total.

**1993-2004**  
**Swanston Street (south), Melbourne**  
 From 41,500 to 60,500 per day. Evening traffic has increased markedly and is nearly 30% of total.

**2002**  
**Rundle Mall, Adelaide**  
 A very compressed city centre, which works almost like a shopping mall. Many people by day; no-one by night.

**2002**  
**Regent Street, London**  
 A total of 55,500 pedestrians per day. Less than Swanston Street in Melbourne.

**1995**  
**Strøget (Main Street), Copenhagen**  
 A total of 71,500 pedestrians per day in this narrow street (11 metres). A healthy evening activity level.
