Introduction	1	2	Spaces	32
About this book	1		Definitions	33
Using this book	2		Ground, 'wall' and 'sky' planes	34
1 Landscape fabric	5		Design planes and landscape elements	35
Contexts for the design of landscapes	6		People's use and experience of spaces	36
Global landscape	7		Form of spaces	37
Landscape processes and systems	8		Interpretation of existing site forms	38
Landscapes and people	9		Geometry	38
Regional landscapes	10		Metaphor	39
Towns and cities	11		Symbolism	39
City districts	11		Abstraction and use of natural forms	40
Urban greenspace and communications	12		Archetypes	41
Models of design and qualities of place	13		Vernacular	41
Responsiveness	14		Historic paradigms	41
Originality	14		Space enclosure	42
Recycling versus <i>tabula rasa</i>	15		Degrees and permeability of enclosure	42
Robustness and inclusiveness	16		Enclosure and character of spaces	43
Mystery, legibility, complexity and coherence	17		Enclosure and microclimate	44
Unity with diversity	18		Spaces and edges	45
Prospect and refuge theory	19		Scale of spaces	46
Wholeness and integration	20		Human scale	47
The integrated design of places	21		Scale and context	47
Integrated design – an example	22		Vastness to intimacy	48
Integration of spaces and paths	26		Proportion of spaces	49
Integration of spaces, paths, edges, thresholds and foci	28		Satisfying proportions	49
Integration of topography, vegetation, structures and water	30		Over-vertical and under-vertical enclosure	50
			Space relationships	51
			Sequence of spaces	51
			Topographic space relationships	51
			Contrast and similarity of spaces	52
			Space relationships – an example	53
