Upper left: Various kinds of urban gardens facilitate activities such as markets, ball games and sun-bathing. The aim is to create robust and attractive spaces to benefit many different users

Lower left: Special attention has been given to a mix of functional and ambient lighting of different colour temperatures using efficient low-energy fixtures

Upper right: The flower garden is a lush, colourful oasis for all ages - primarily designed for quiet pursuits and as a recreational space for Aalborg's new harbour pool

Lower right: Wavy pavement patterns along the boulevard create subtle references
