Aeronautics Engineering

Outcomes/Comments from IAP Panels in 2020
Have to keep the core courses as there are but need to embed more real industrial problems for assignment, work projects and case examples
SKM shall engage anthropology and humanities department to enhance the method in stimulating the students problem solving capabilities.
To be 'in' industry, lecturer should strengthen their relationship with industry through long-term engagement and in-kind project participation
Use reverse engineering approach to understand the aircraft design concept and solve real/related industrial problems
Enhance students coding skills through the given case study/project
