

(1) WinEdt

Open winedt

- Make Sure equation editor ribbon is on (SIGMA simbol)
- Run a TeX file till TEXIFY (to make sure that pdf is open & runs fast for the student later)

Use given tex

Save it as DUMMY on Desktop

Texify the file till Tex Output appears.

(if new registration popbox of ADOBE appears, click AGREE, NEVER REGISTER)

Delete all related DUMMY files on DESKTOP.

```
\documentclass{article}
```

```
\begin{document}
```

```
\begin{eqnarray}
```

```
Y_{ij} &=& abc
```

```
\end{eqnarray}
```

```
\end{document}
```

(2) EXCEL

Make sure that it is possible to use sum function for the numbers in the file

(3) R

Run script file on DESKTOP

Delete script file on DESKTOP
