TEACHING PHILOSOPHY

My philosophy of education is that all students are unique and must have a stimulating educational environment where they can grow physically, mentally, emotionally, and socially. It is my desire to create this type of atmosphere where students can meet their full potential. Technology must be incorporated into the design. I aim to bring an open mind, a positive attitude, and high expectations to the lecture each day. Teaching is a process of learning from your students, colleagues, parents, and the community. This is a lifelong process where you learn new strategies, new ideas, and new philosophies.
