III. RESULTS

1. Regional comparisons
2. Focus on Africa

IV. IMPLICATIONS & CONCLUSION

I. INTRODUCTION: RATIONALE FOR THE SURVEY

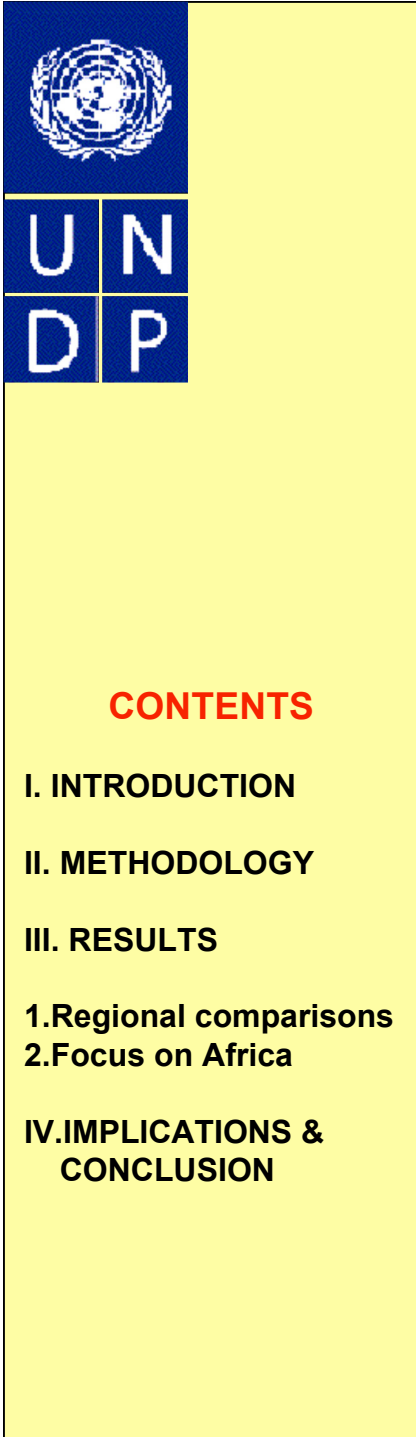

Land governance is the formal and/or informal systems which determine who gets which land resources and under which conditions.

There is a worldwide recognition of the centrality of land governance to development, and a renewed interest in the international community including within the UN due to the increased of land related conflicts, the role of land tenure in the environment sustainability, housing problems related to rapid urbanization, gender implications of many land tenure practices, demand by indigenous people and so on....

UNDP has been involved in a number of aspects of land resources governance, but has not had any explicit system-wide programme on Land Governance.

This discrepancy has pushed UNDP/BDP to launch a **Cross Practice Initiative** (CPI) in order to determine how significant this issue is to UNDP and to identify the types of resources which would be required for UNDP to systematically engage.

The global survey which is part a foundational of the CPI project and aims to provide a better understanding of the perception of the importance of land resources governance within the programs of all the Country Offices and provide information on Country Offices' interest, capacity, demand and specific capacity building needs in order to support mobilization of resources by/for Country Offices for land related projects and programs. CPI has evolved towards a pan UN process...

- } The questionnaire

III. RESULTS

1. Regional comparisons

- 1.1. Responses rates by region**
- 1.2. Main land issues by region**
- 1.3. Mean number of ongoing UNDP land governance projects**
- 1.4. COs willingness to get involved in land governance issues**

2. Focus on Africa

- 2.1. Main land governance issues in Africa**
- 2.2. Land governance issues and MDGs**
- 2.3. Key can actors in Africa**
- 2.4. What does UNDP have to contribute?**
- 2.5. Entry points by practice area**
- 2.6. What would be required for UNDP to contribute more on Land Governance Reform?**
- 2.7. Country Offices needs**

IV. CONCLUSION

How has the survey been conducted?

IV. IMPLICATIONS & CONCLUSION

*

II. METHODOLOGY

1. Work organization

- } Letter to Regional Bureaus to require their approval
- } Design of a draft questionnaire
- } Submission of draft questionnaire (and background documents) to UNDP participants to various land related workshops to help us improve the design and content
- } Final questionnaire production, translation in French and Spanish
- } Send out the questionnaire to country offices (132)
- } 2 months follow-up
- } Data upload and analysis

2. Structure of the questionnaire

A: Land resources governance situation in the country

A1: Your Country Office involvement with land resources governance

A2: Country situation with land resources governance issues

B: The way forward for UNDP

B1: UNDP Country Office's strategy

B2: UNDP Country Office's needs

2.4. What can UNDP bring as member of the UNCT?

* The proportion is calculated in reference to the countries which have replied to the questionnaire (continental Africa)

What can UNDP contribute?

CONTENTS

I. INTRODUCTION

II. METHODOLOGY

III. RESULTS

1.Regional comparisons
2.Focus on Africa

IV.IMPLICATIONS & CONCLUSION

Mandate and significant experience in development issues

- } A greater network of development experience and lessons learnt around all UNDP Country Offices worldwide and a track record in development management
- } Ability to draw on a world wide pool of resources to tackle the issue
- } Has development work tools like micro finance, human rights and gender equity
- } Ability to deal with cross cutting and multidimensional themes
- } Programmatic linkages among governance, justice, natural resources management and reconciliation
- } Strong experience in partnership building

Long term physical presence and world coverage

Knowledge of the on the ground constraints
 Strong linkages with government stakeholders which are involved in land governance issues; has created a good working relationship
 Traditional and trusted partner of government
 Good working relationship with other civil society organizations

Neutrality

Political neutrality widely recognized has made UNDP become a trusted partner for governments

Coordinator of the UN Country Team

Has the capacity to mobilize development partners in this area
 As a Resident Coordination agency, it is easier for UNDP to approach such a sensitive subject without appearing to be overstepping its boundaries.
 Well positioned to work with or coordinate joint activities between UN agencies and non-UNDP stakeholders

What is UNDP already doing in this area?

IV. IMPLICATIONS & CONCLUSION

2.5. Entry points (cont.)

| | Poverty reduction | Env& Energy | Dem o Gov | Crisis prev | HIV/AIDS |
|---|-------------------|-------------|-----------|-------------|----------|
| Promotion of micro finance/ loans to the most vulnerable people, land as a collateral | x | | | x | x |
| Efficient/sustainable natural resources management (revalorisation of Eco services) through capacity building | x | x | | x | |
| Land use planning, implementation of a national water strategy, create land reserves | x | x | x | | |
| Resettlement (reintegration of displaced persons and entrench their rights to land ownership in their homeland) / promote economic and social opportunities within host communities | x | | | x | |
| Effective mechanisms for land disputes resolution, dialogue promotion between different communities | | | x | x | |

How to make it better?

CONTENTS

I. INTRODUCTION

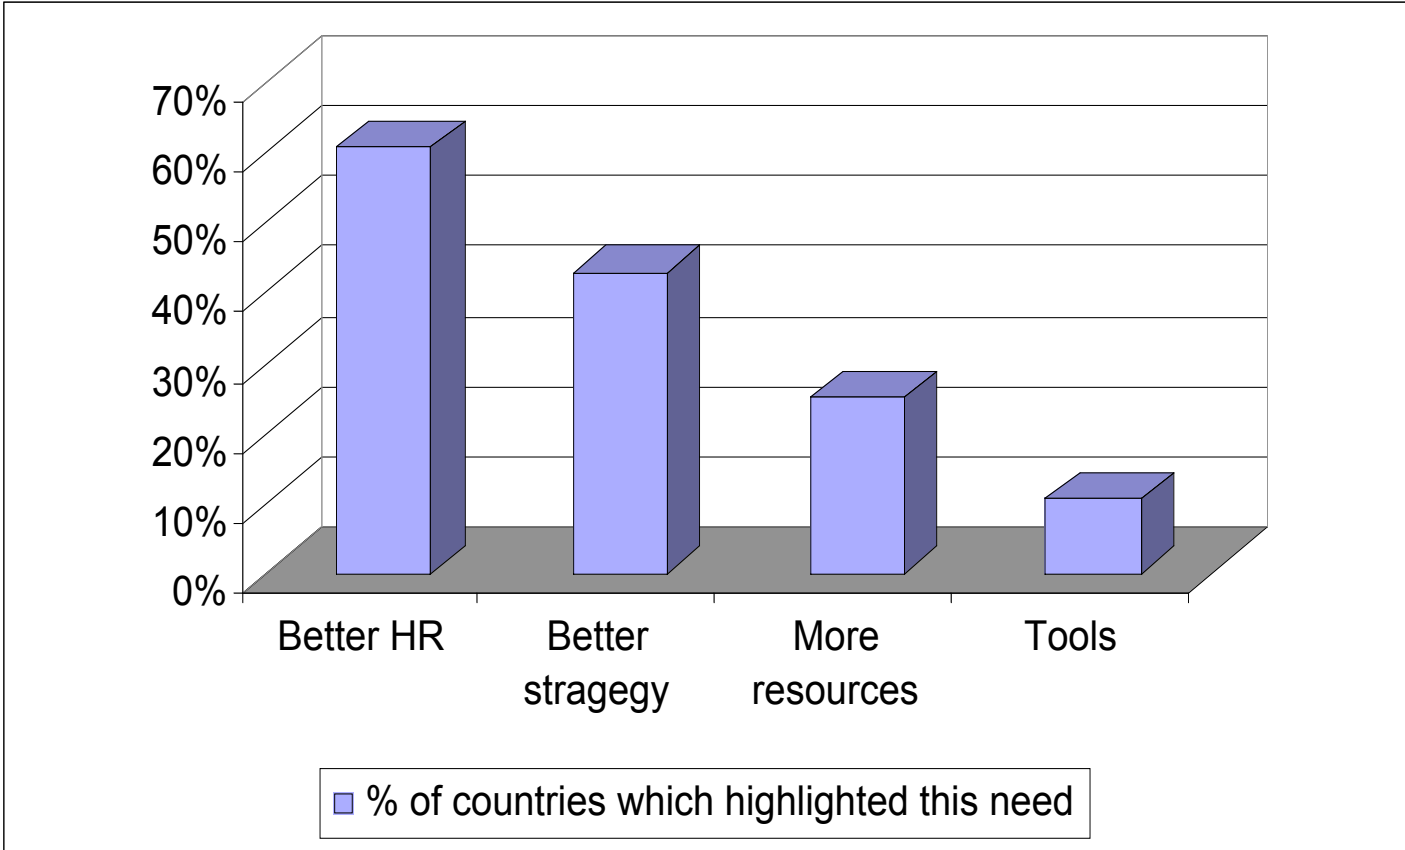

II. METHODOLOGY

III. RESULTS

1.Regional comparisons
2.Focus on Africa

IV.IMPLICATIONS & CONCLUSION

2.6. What would be required for UNDP to contribute more on Land Governance Reform?

- Data from ontinental Africa responses
- Sources: global survey questionnaire data

2.7. COs needs

Training needs in:

- } Various land administration and regulation disciplines
- } Agronomy and Agricultural practices
- } Natural resources Management
- } Land rights and taxation, city management, legislation
- } Conflicts resolution, crisis prevention and management

Human resources:

- } Experts, national consultants, technical advisors, UNVs are required in the area of :
- } Agronomy/forestry/environment
- } Law/ land tenure/ land governance/town and country planning
- } Sociology
- } Economy
- } Communication

Supporting materials

- } Legislation texts in local languages
- } Successful land reform cases in the region
- } Guidelines on best practices in tenure securisation and mainstreaming in country planning
- } Didactical materials (guide for trainers and advocacy)
- } Documentation on city governance
- } Support for the design of town detailed planning

Networking and external support :

- } Support from specialized services like UNDP(BDP, DDC), IIED, GRAF, use the UNDP thematic centers network
- } Technical training at the WBI, UN University and different academic institutions
- } Best practices and experience sharing/ Networking with agricultural research institution and national NGOs that have acquired extensive knowledge and lessons learnt
- } Periodic thematic discussions on land governance within the EE knowledge network
- } Create a network of specialized jurists in land governance (taxation, administration, conflicts management)
- } Create a network of land stakeholders

Implications

III. RESULTS

1.Regional comparisons
2.Focus on Africa

IV. IMPLICATIONS & CONCLUSION

IV. IMPLICATIONS AND CONCLUSION

} The strength of the link between land governance and development is clear

} It is a highly widespread and complex issue which need the involvement of institutions with a range of experience/knowledge to share

} In spite of not having been systematically involved, UNDP has done a considerable amount and range of work in this area, through projects, advocacy or other activities which have direct and indirect effects on land governance.

} Nevertheless, joint activities could result in significant synergies; especially in Africa where resources based conflicts for example are hampering development. A significant amount of work can be done under political umbrella of the African land policy framework put in place by the Au and ADB.

Next steps

 - 2. Focus on Africa
- IV. IMPLICATIONS & CONCLUSION

IMPLICATIONS AND CONCLUSION (Cont)

Possible joint activities:

} Identify the comparative advantages of each UN agency in this area and design joint programs through UNDAF

} Can be discussed at the country team level, identify ongoing and planned projects, collate best practices, and develop a collective framework for engagement on key issues for that country.

} Promote an adequate recognition and understanding of the land governance issues in the UNCT

} Identify lead agencies as champions on various uses

} Necessity to agree on need and areas of action; then chart out common strategies and share out roles and responsibilities. Subsequent adoption by internal institutional processes and formalization of joint programs.
